

63.SRI BHAGAVAN

26th May 2024

Q1 . Dear Bhagwan, how does the one mind work?

SRI BHAGAVAN

I have spoken about the one mind and the ancient mind because the mind has not changed much. The structure of the mind is very much the same for the last probably 250,000 years. But uh the contents have been changing. People in olden times were afraid of the tiger or maybe the weather but now we are more concerned about the share market and other things. So the content has changed but the structure is the same. So I'm not going to go into that which comes under what we call the ancient mind and the one mind because everybody's mind is the same only the structure of everyone's mind unless you are enlightened is the same. So now the question is how does how does what's the question actually? How does the one mind work? How does the mind one mind work? I'll go a little deeper into this on occasions I have spoken about it.

So you must understand that you are a TV channel where you can see various channels and also you're a TV studio who broadcasting all the time. Now the broadcasting which you do happens from the back of your head from a spot which is called bindu. From where the broadcast is going on all the time and to whom does it go? It goes to all of humanity. your broadcast they would receive it if they tuned into that, similarly the TV channel which tunes into all these broadcast is in the brumadhya that is the center of the eyebrows that's where you receive all the signals suppose you're thinking of something like sports and that kind of information would flow through the brumadhya suppose you're thinking of let us say science that kind of information would flow through from anywhere on the planet from people so All people are

connected to everybody else. Every one of you is connected to everyone else on the planet including of course animals, plants also to some degree. So continuously you are receiving information and you're transferring information whereas you think that it's all yours and that you're doing it.

Let's say somebody is working on some philosophy or some science or some technology something was going on and if you get an insight that would most naturally get broadcast and if you happen to be tuning into it, it would come into you as your intuition and you think you got there, but actually what's happening is transmission that's why when you go back into olden times you would find that let us say Lord Tzu, Confucius, Buddha, Socrates, you'll find almost the same time scale will be involved because they arrive as a group actually because of the same principle of transmission and reception. So now imagine a country where we are transmitting and we are receiving signals. Basically it is say based on the media the mainframe media and the social media so many signals are coming in into us and we then again broadcast it and people start thinking and from them we receive it. This goes on and on and then there's also domestic violence. lot of domestic violence there which also gets transmitted.

So that is why sometimes when we work let us say on the husband here in India the wife in New York would get transformed they were not even talking on the phone but as the change happened here he's broadcasting without his knowledge and the wife there receives, but he's speaking about the husband and she's in New York so we have number of recorded cases where people far away in space and in time have simultaneously changed or transformed because of this transmission. So what you must understand is each one of us is connected to everybody else and generally we communicate negative emotions. If a group of people are having negative feelings, negative emotions is a better word. So they keep transmitting it and others keep receiving it. And once the numbers increase, this negative transmission increases and it moves to the point of depression, then things begin to happen. There could be lot of violence breaking out in society. Some two people walking by might

start fighting. They would not even know why they started fighting. As somebody gets drunk, you would start fighting. All this disrupts society and when it becomes too much it ultimately lead to war . It'll influence leaders and the important people required to fight a war all of them will get activated that's how we are inadvertently not knowingly we are creating war also we ordinary people we create war we create riots we create all kinds of let us say flu break a break out of a flu of a virus. We can create a virus also. That is the power we have collectively.

So we can play with the weather also. We can bring about climate change. Changing the weather, we have done it very often. So now all that we can do because we work collectively without our knowledge. Now what we want to do is collectively after to making all of you enlightened in a very focused way. We want to broadcast things to the rest of humanity. That's why the number is 81,000 based on the population. It's like a lighthouse. So powerful would be the broadcast everyone on the planet that they would almost be forced to receive it and they would become enlightened. That is the principle we are making use of for our work.

Q2 | Dear Shi Bhagwan are das enlightened? Does the vision of the moment keep changing?

SRI BHAGAVAN

There are many dasas who are fully and completely enlightened. And there are others who are not enlightened but are very close to becoming enlightened. anytime, any day, they could become enlightened because they on the verge of enlightenment but many are fully enlightened.

Now for example, the one that is asking the questions is fully enlightened. If he is not functioning, he'll just be silent. That's all. Just be sitting. He can be alone in a room with no activity, nothing but in immense joy. He moves over into super states and he'll be in that state. But when you have got to do some

work, you would come down from that super state because you cannot function from that state. But still the joy will be there. Everything would be there. So there are many dasas who are extraordinary, wonderful states and are fully capable of transmitting that state which they allowed to do in some of the programs regarding the vision of the work.

Yes. See if you actually go to Satyloka near the golden rock you'll find a board and the board would be that board was planted 40 years ago not one or two ,40 years ago that's where we have put our intent we always get the intent and then move towards it intent the board says that temple of God capital God but our definition of god is very the temple of God. And then beneath that, it says, This place exists to set man free. I repeat it. This place exists to set man free. Which means what? You're not free. This work is all about making you free.

So now that is our goal. Make you free. Uh suppose you want to do a PhD and you're a small kid must first go to LKG UKG standard 1 2 3 4 10 plus 1 plus 2 then graduation postgraduation PhD similarly we are changing based on the power that is available how much power is there with us to help you based on that we keep changing it's like you go from one standard to another the power has been growing over the last 40 years. So and accordingly we keep changing because only they understand unless you come to let us say eighth class we cannot teach eighth standard subjects to you. You would not understand. So you must come from third class to fourth class to eighth class and then we can teach you and it appears as though we are changing. No the goal is fixed. You're only going step by step by step. We are teaching things only when you are ready to receive it. Otherwise you'll be disturbed. You might go out of balance. So we are going carefully plus you are also Gruhasthas , you are family people you have jobs you have professions you have businesses there many things you have got to do for survival therefore we cannot simply pushing into states because we have had difficulties in the early years when people began to move to very very high states very very fast and completely uncontrolled.

For example one gentleman came , what happened many years ago so We inadvertently gave very powerful diksha not realizing that he will not be able to take it. So quite a wealthy man. So he went back I'm not mentioning the names of the places. Uh he had a very big uh shop. So the moment he went to the shop the next day onwards he began to call the people of the road especially the poor and be to distribute the entire shop freely . You take this you take that everyone. He said everything all are one. I am everyone. All must have everything. So in two three days entire shop became empty. Then his parents they tied up his hands and legs and they brought him physically to us and said what have you done to our son today like a shop. It's a huge shop. Every item has been given away in 2 three days time. Now what do we do with him now? How will he survive now? You would answer. Then fortunately there's enough time for us to rework and bring him to normality and then , we sent him back home. So some cases happened that way and we became very very careful after that. That's why we are moving carefully and there are also some people who just died also. They said no there no point in living now we have to move on. So we said no, we'll go slow from then on we we began to go slower carefully we are moving but now for example this year will be very powerful 2024 now we are entering June the power is going to be stepped up enormously cuz now you are capable of taking more grace or more power you'll be stepping up then year after year it become more and more and more powerful now what is this thing setting man free which means you're not free.

What's the problem so this thing also we do not talk much little I will talk I'm waiting for some more scientific evidence that should be available the next few years most that is there I will talk more but it is there but certain things I just do not want to talk to you based on mystical information or mystical visions but I'm depending more on scientific evidence before I talk to you. I want to present it to you with scientific evidence not mystical evidence. Or if you become a good mystic in the meanwhile you could yourself check out on all these things. So now you see we are called homo sapiens, sapiens technically before us there were some eight or 10 species who are there.

Almost all that is gone. They have all become extinct. One was of course known from history textbooks. The Neanderthal man was there., is mostly found in Europe. Then there was the Denisovan was found in Siberia and other places. And then there's the Peking man. So then there was Homo erectus. So various varieties of beings who are there. Now they're all not there. Now they become extinct. No, I'm not going to go into reasons as to why they became extinct, but they became extinct.

Now, we have some evidence as to their capacity. Some 250,000 years ago, we seem to arrived homo sapiens, sapiens. Now, fortunately, genetics is so advanced today that we can compare the genes of those people with our genes. So because we came from them, we came after them. So they have been there for millions of years actually . We are around only 250,000 years. We that is this homo sapiens sapiens. They have been for a long long time. So now genetically if you look at the two genes the jump is very sudden very very sudden. Now had they continued that way evolving they would still be evolving. But still they would not have come to our level. They be still far far behind. Question is how did we jump without an external influence , they could not have made this huge jump. It's like overnight jumping. So what happened was I will not here again go because I'm waiting certain scientific evidence. No, we had this 10 varieties of eight or 10 or 10 I think possibly 10 varieties of beings before homo sapiens sapiens.

Now there were some other beings also. I'm not going to talk about from where they came, why they came, what they came, all that kind of stuff. They there you might just call them the ancients. ancient that's all and they were very very advanced in almost every way. These people wanted servants, servants who were slaves. So what was there available already? They replaced the genetic code a little bit with their own stuff and we were produced. We are some kind of hybrids artificially produced to work as slaves to work as servants while they are the big Maharajas. They had to enjoy life. So if you are a big rich man and you want to enjoy life, you need lot of servants, lot of helpers, workers. So they needed that for that. They produced

these people. Now to keep these under control, you have to introduce some kind of suffering in them otherwise you cannot keep them under control. You cannot make them work. So all those requirements were there and that's how we were designed and there was a difference of opinion among them. Some said let us not do this experiment because tomorrow they might turn against us. They might drive us out. Let us not do it. Now all these ancients are those whom we call gods whom we worship as gods. they are the ones those people said no we have to solve this problem we have to produce these people so there was differences there and finally we were produced.

And the question here you must see is all these gods were highly armed highly equipped with very powerful weapons if they are only loving and compassionate and they had they could do anything they wanted. Why were they armed? Why were they equipped with all kinds of weapons for destroying us? They had all those things. They were living in fear of us. We lived in fear of them. They lived in fear of us. Now I'll give you an example. There's a village. I'm not doing details again where some kind of structure not exactly a temple some kind of a structure is there where it seems to be a place where somebody was buried. It's not in our country and every year people on one day go around the place and they sing a song and do you know what is the song? The song is today we killed a god. They're all called gods. Today we killed a god. So they killed a god and they're celebrating it. So that is there was a conflict between these two and somehow that god was wearing something still kept there. It's a gorgeous necklace kind of thing and the is possibly around 8 ft in height. So they were the people who had their own territories divided powers they had different kinds of powers with them. They had their own troops, their own armies. They had when they had equipment all of course the British came to India they British were only around 1,000 officers and 10,000 soldiers at one point of time and rest of all the people who were fighting were Indians. So the British came, they robbed the Indian money, paid the Indians and kept the mercenary soldiers. Here we are all working with the gods and there are fights among the gods. So we used to be

fighting on this side on that side we are fighting. So all this kind of thing happened.

So you are programmed to be a slave and a servant to be in suffering. Look into yourself. The core of your being, what is there? The core of your being is fear. Nothing but fear. You are nothing but fear. That's what's inside you, deep inside you. Of course, you have been very clever in creating systems whereby you can manage your suffering. Escape through this, escape through that, through so many ways you can manage suffering. All the suffering need not be there. That fear need not be there. Just put in there a slight genetic modification and your brain is affected and some areas are shut down, some are activated and there that's what you are. So you are artificial products not by God. God did not create you. No not at all. You are created by gods whom we refer to as gods. They created you for their purposes. And also some of these gods they fell in love with this humans humans and had children through them also. That also is another story. So now our work is all about suffering. Where does this suffering come from? From the very fact that you are designed like that you are not free at all. Look into yourself. You don't have freedom. Your mind is controlling you all the time. The same mind you having continuous problem with your father or with your wife or with somebody some other player or some other person. Your mind is more like a record player and the same record it is playing and playing and playing and playing. No, unless we change that record, how are you going to change? How are you going to improve your relationship through all our programs? You're slowly changing the record. If you cooperate, we can do it very very fast. You do not cooperate so well. That's why it takes time. But once you change it, relationship becomes so very beautiful. But it was designed that it goes on playing the same record again and again. You're an eternal slave. So always moving from the past to the future. All your behaviour is because you're a slave.

So this being the case, when will you be really free of suffering? You have physical suffering. When that goes away, the cycle of suffering comes. That

goes away, then there's spiritual suffering. But always there is suffering. You're never free of suffering because you are not meant to enjoy this life. You are trying to enjoy. But you are not designed. You're only a worker. If you work in your house, you only give some payment to work. That's all. You're not so much concerned about him. That is your condition. And if anything went wrong, you did not behave yourself, you were sacrificed. In some cases, your hearts were pulled out and thrown like that. So just like the British were ruling over us and finally we could throw them out. The same thing happened to the gods also. But fortunately what happened was initially we were worshipping the sun and the moon and then what happened the Indians are experts and of course the whole world of course was doing it. We took the sun and the moon inside it became ida and pingala they became on top of that. So similarly these gods after they driven out they were internalized but the statues the temples give us a good idea of what they were doing what they were they were doing experiments in temples they were trying to cross human beings with pigs sometimes wolfs all kinds of funny funny things they were doing not just in India in India Indonesia in South America many places you get this things they were doing all kinds of experiments They were experimenters and we are like you do experiments on monkeys on rats like we do uh research on them. They were doing with us but meant for that particular purpose. That is why the board says to set man free. This whole work is about setting you free. You so that you become free till you become a god. Not that kind of god far superior to that. So we can go on talking about it. Maybe some other time we'll talk about it.

Q3 | Bhagwan who are the gods?

SRI BHAGAVAN

Oh, there are varieties of gods. Once you leave the earth, leave the body, you'll be able to see them. Many varieties of beings, varieties of gods whom you call gods, whom you call light beings, various varieties are there. Different in size, differences in color and differences in power, such variety is there. But basically whom we are referring to as gods is once you become

starting with the enlightenment becoming a one light being or one is one is being light being then space being and finally after death and in very rare cases were still alive you could go enter the light and come back and then you become a god with immense powers and you could travel around helping people. Not only this planet any planet you could go.

Now some of our devotees who are very good bhaktas and who are very very great sevaks who died just a few years ago have become gods. They become gods. They appear they do satsang here and they were doing seva with lot of other people. They appear in their dreams talk to them guide them and those people pray to them. They are doing miracles for them. So our own devotees whom you might be knowing have become gods and there's lot of evidence to show that they become gods. Especially for some of them the Paramjyothi comes on them and sometimes you can see them coming as a light being. Our own devotees whom you knew have become gods today and our wish is that all of you must become all of this 81,000 people must become gods. It is possible if you could cooperate certainly, you could become gods. Of course then absolute freedom then even before that there is freedom but as a god that freedom cannot be imagined. These gods will be below you.

Q4 | Dear Bhagavan, why is yejnam so important?

SRI BHAGAVAN

That's very simple. See in ancient India lham was very important but in the advent of Buddhism that began to become less and less important. Of course there are some section of people who used to go into the forest that's different or away from society. But when you live in society you live in the thick of the world you have a family you have a job you have a business you have profession. So you need material wealth otherwise how do you survive. Now if you're going to struggle with that, then you cannot focus on the spiritual. So on the other hand if you have all this and also there's something nice about this world where you can enjoy many things like those who made

us gave us the desire to eat food the desire for entertainment some nice things are there here to enjoy. So we could enjoy that also that is not a an obstacle to your enlightenment.

And secondly, you need those things otherwise they're going to bug you. You would not be able to focus on the spiritual matters. So you need some a decent amount of comfort and to lead a happy life and to enjoy it as much as you can. It would be helpful. You should not forget that the Buddha and the disciples if there's a marriage and they would invite they'll be the first to rush in to the marriage hall. But they also wanted to eat good food, you know. Christ and his followers they have to be most ready to come to a wedding because there they offer also wine they will drink and they will eat all this you will find in the Bible so Iham is required otherwise you go away to the forest somewhere away from society there are berries available there which you could eat there some small fish we Siddhas eat. Once one gentleman came and asked me I'm eating small fish it said But I said, How big is the fish? Then he showed me small. So so so big. That's fine. I said, So anyway, the Siddhas living in the mountains, that's the only food they have got for the protein needs. So nothing wrong with Iham. But of course, if it turns into greed and they want everything to be yours that he wants to greater than everybody else, then it's a different story. We are not talking about that. We talking about what you would love to have. You love to have a car. What's the problem? Have it. As long as I don't do something with it. You don't run over somebody out of your arrogance, it's fine. So that's why all our programs are Iham and param combined. A young boy, a young man comes to me and then I can't talk to him about living in the forest or doing this or doing that. He is coming to me basically to get a life partner, a girlfriend. That is what he's concerned about. Or if it's a girl, she wants a boyfriend or a nice partner. So I'm only concerned about that. I cannot be speaking to him very high things. At that level, we are genetically programmed to function like that.

Initially, you know, we are only clones. So they thought the population could be kept under control. We are all clones at the very very beginning. Then they

thought this way it's going quite slow. We need more of this worker the servants. That's when we are allowed to procreate and then we began to breed and breed and breed so much till we drove them out and killing the gods. So that's why Iham is quite important.

Q5 | Dear Bhagavan, how is this year 2024 important?

SRI BHAGAVAN

I think I was speaking earlier this year the I use the word power very secular kind of word instead of grace is going to be stepped up enormously. In fact, it will be stepped up from today itself the power would be stepped up. So you will see a lot of things happening this year in terms of your growth.

Q6 | Bhagwan. How is the M&M process important?

SRI BHAGAVAN

See in the M&M process we are talking that's one thing but silently we are working on you. We are working on the various koshas which is done without telling you. We working on the annamaya kosha the body. Then we are working on the Mano maya kosha. We working on the karmaya kosha. So we work on seven koshas. I won't tell you in detail right now. So all that will be done in the process following the class. That's the process where we'll be working on that again without telling you something when we tell you, you try to interfere in that and you disturb the whole process. But we are processing you so that you ultimately become free. All told it does not work because of your nuisance. You're poking your you read so many books this and that and you come up with those ideas. These are none of that actually. Oh this thing we found there that thing we found here similar it is not at all the same. That's why I told you if you think we're talking the same thing then you not understood us. But you are so greedy and you want to learn everything what is being taught. You're not understood fully. You've not grasped it fully. But

you're running around here and there and come all kinds of stuff and we have to waste our time on those things. That's why some things we are just bypassing you and doing it for you. We finally become free.

Q7 Bhagwan., have we been taught all that should be taught?

SRI BHAGAVAN

Oh no, not at all. We have taught you just a few things. As I told you, you will not be able to take it. I gave the example of a man who went home and gave all the things, all the shop items to people. You go out of control. You could become Avadhoots also you could become Aghoris also, anything you could produce. So what tomorrow your wife comes and asks me you have made my husband into an Avadhoot, will society accept. No we have to give things very carefully cuz it'll lead to a process. That's why we not only when you are grown then you might begin separately. Of course we can simply talk from inside and give you also everything cannot be given to you. Please remember you are Gruhasthas, in the thick of the world. We have to protect you there. We can't give the freedom whereby you destroy yourself. Not that somebody will immediately stop doing his business, give up his job, run away from all those things. No, no, no. We need a society to function. You're not all enlightened. We need rules. We need laws. We need a government. We need all these things. Otherwise, how do we exist? We can if you are all enlightened, but we are not. So most of us are people who came from hell. That's what it is. We have a terrible world. You can see the world is so terrible. Why? Because we are people who came from hell. There are lots of people who came from hell. Therefore, everything cannot be taught to you. Only what is required for ultimate freedom will be taught to you.

The rest of the also you must become a powerful mystic. See in the earlier years the very beginning of the dharma we used to have groups of people and send them in mass to the moon to the mars into the past the future. All that work is stopped because things are happening too dramatically in the people

that is loosening up the family bonds. We do not want that to happen that the family is very important for us. We want you to be enlightened in the family not be running away. So all things will not be taught but definitely one day it be taught. If you do not uh teach you now when you leave the planet in no time we'll teach you.

Q8 | Dear Shri Bhagwan, do all paths lead to the same goal?

SRI BHAGAVAN

Yes, I told you this universe is totally empty. to use simple words it's totally empty there's nothing there it's a zero it is not exactly something which you can understand the zero cannot be how can you understand zero so not only now never will you be able to understand the zero. It is the unknown and the unknowable so for functional purposes you can take it as shunya or empty just imagine something empty. So what is there is only an illusion and there's no central god who was told to behave like this or behave like that. No, not at all. And all the god that we know were these people who made you as hybrids who made you to be the workers. So you have all the freedom to live the way you want to live.

That's the first thing. Suppose you want to go to heaven where continuously eating, go there. Suppose you want to go to hell where you can be continuously singing and dancing. You could go there. I told last time I think you can go to the world of boxing, racing, any kind of empty number of worlds are there. Heavens are there. They called heavens. You could if you like that you could go and enjoy there. We are offering you one kind of place that's all. Now suppose you take a road to Chennai you'll come to Chennai. Suppose you take a road to Hyderabad you'll go to Hyderabad. Suppose you take a road to Delhi Delhi. So what all the gurus have created all the gods have done is separate separate worlds are there. Different different states are there. So you follow that you'll go there only. If you worship Vishnu, you go to Vishnu's loca. If you worship Krishna, you go to Krishna's loca. You don't go to Shiva's

loca. So depending on what path you are taking, that would be your goal. And you freedom to choose any path that you want. So it's not all paths lead to one place or not at all. That's a terrible lie. That is all paths are different. Only some paths you'll be able to take. You can choose whatever path you want and you will go there. The world is a play thing. The universe is a place to play. That's all. You can have different kinds of consciousness. It's up to you. And you may change also after some time. So there's no question of all passing the same goal. No, not at all. That's not the way the universe is made.

Q9 | Bhagwan when would those who have taken dika from Shri Amma Bhagwan would be guided further?

SRI BHAGAVAN

Those who have taken dika from Bhagwan would most probably or most certainly would come to Bhagwan's loca which is what is the loca of the Paramjyothi you know so that's where you will come and of course if you don't want to come you can say I'm not coming it's fine But that's where we will try to take you now. We have laid the seed for you. But that's a process. That process will be doing in 2024. So the dasas have been specially trained for that and they will do that process for you on specific days for those who come for the uh diksha they will do their work and they'll people will happen to move quite fast on that track that will be done by 2024 end we'll be finishing it probably it will be once a month so later on the dasas will speak to you about it and we'll guide you and you would move very fast , so fast that it's a kind of preparation that you finally of course you live a long life when you finally want to leave the planet you'll come to our loca.

Q10 | Dear Bhagwan how do Shri Amma Bhagan feel while giving diksha to us?

SRI BHAGAVAN

When we give the diksha we are not in the normal state we feel that the one who opposite is us only. As you stand there begin to feel you I am you. I am giving dika to myself. Whoever I am, whatever I may be a male, maybe a female, maybe middle-age, young child, whatever it is, I'm exactly that person, that is my experience. The same thing for Amma also I'm just talking from my point of view. This is something very strange. This is very new to you. You never possibly felt that you are the other person. Here we heal it is the other person and the other person has got a lot of problems, lot of suffering and pain is there that the moment is completely we can feel that and then the diksha goes out that it must all change as sankalpa is inbuilt into it but again I told you if you move too fast there will be problems, so slowly you'll be moving through the year step by step but uh you don't get blasted But you don't become an Avadhoota or Aghori or run away to the forest all that should not happen no.

So that's why in one blow we are not doing it going it slowly but you put the seed there the seed is done by feeling that I am you you are me and can completely see the entire life can be seen from your birth the present day what all you have gone through is it flashes through and then diksha is of course going to the energy body it's a very subtle thing and the seed is being laid but we'll working upon it during the course of this year we'll start this in June. Yes, in June we will start this work and then we'll go on throughout the year this year whereby working on the inside. Of course Iham also will be taken care of but the focus is on param . All these small small children who came they will effortlessly at some point become enlightened and they'll be very very successful in life.

Q11 | . Dear Shri Bhagwan, what is the difference between Sri Amma Bhagwan and Sri Paramjyothi Bhagavati Bhagavan?

I think I have told this earlier also. Anyway, I'll repeat it. So, Amma Bhagavan are the ones who are physically on the planet. We are referred to as avatars by some people meaning that we are here to establish this work. There a lot of things to do. Anything can be established. Something has to be established by people who are on the planet. Otherwise, how do you do it? So, our work is establishing this work. But Paramjyothi Bhagavati Bhagawan is like all the feminine aspect of Paramjyothi is Bhagavati and all the male aspect is Bhagawan. So any god that you worship there's a male and a female. So it refers to the male component and the female component. It refers to all the gods. All the female gods and all the male gods. And that Paramjyothi Bhagavati Bhagawan only does all the miracles comes to you in your dreams comes to you in your visions comes sometimes physically to you. All those things are being carried out by Paramjyothi Bhagavati Bhagawan. So they are doing that they are global. That's why you find they are doing miracles across the planet. They're giving soma across the planet. They're moving the pada across the planet. They come as Paramjyothi across the planet. Everything the whole globe we work on small areas but grounding the work. So we are avatars but they are Paramjyothi Bhagavati Bhagawan.

Q12 | Next question is from Euro, a Jew from Israel. Dear Shri Bhagwan, lately I heard some people sharing experiences very similar to mine. I thought I would ask you about it. I have been in a state since 2005 which has not changed. I have solid inner silence. It is like a block of immovable unchangeable silence. Maybe even infinite silence. I have thoughts but they have no charge. They come and they go and they have no weight or effect. The inner drama is no longer there. There is no guilt or pride and the hungry ego seems not to exist anymore. I'm still separated from the rest and I have no feeling of unity. There is no experience of unconditional love or ananda or any positive feeling. It is more like my emotions are annihilated and they also become silent or without any charge. When I got this state, it was like someone put a pin in my head and release all the pressure that was there. When I do some breathing exercises and hold my breath, it feels like the whole thought process is slowing down to be only fragments of sentences or fragments of songs floating very slowly like an astronaut floating in space and some space debris moving very slowly coming this way

almost like moving in a jelly. I am forever grateful for Amma and you for giving me this state and taking me out of the hell that was my mind. Would you please talk about this state what it is what it means put in context so I and others could understand what we are experiencing. Thank you.

SRI BHAGAVAN

This gentleman is an Israeli Jew. was some 19 years ago he walked into the campus at Nemam and very accidentally I think he met Amma and Amma was giving dikas at that time and as he bowed his head before Amma ,Amma touch dika which is a slight dika it is touch diksha just like that and then after taking that dika he walked in the campus and in 5 minutes time he was fully enlightened and for 19 years is completely enlightened. He's a fully enlightened person but his question is he's not having that love which I talk about he's not having that oneness which I talk about that is the problem for him but otherwise he's enlightened fully but that unconditional love I talk about now there no feeling of oneness so that is not there as I told you we are going slowly little by little little by little we are going because earlier we had went full speed there were all kinds of disasters. So therefore we had to slow down. That's why just gave a simple touch dika just like that and in 5 minutes he was gone. He's fully enlightened. He's actually not there , fully enlightened. But now he is hearing about all these things and he's wondering why is it that I'm not having those things because that's only a simple touch the sankalpa is only enlightenment. Sankalpa was not for oneness. Sankalpa was not for feeling the to be in great Ananda. That was not the Sankalpa. In later years he brought them in as he we understood we can handle things better. People are better prepared. So now how he has asked this. So in the next few days he'll also have love over this and the ananda. That is why some times , I will be telling Amma , not to go full speed . Slow sown, slow down, we had some very bad problems, some people were in were high states and they became crazy and rushed in to the campus It was so uncontrollable .

Q13 Shri Bhagwan if we switch off our minds entirely won't that hinder the progress and success in the real world. I feel like I might lose motivation. Can you offer some advice?

SRI BHAGAVAN

So that is why I'm telling you will not lose control. We are doing it very carefully and slowly so that you will not leave this your job or profession or your family. You still live within it and you'll be doing all your work. For example, I have dasas, several dasas. many dasas are fully enlightened. It's amazing to see them work. That kind of efficiency you will not get from unenlightened people that because so much of energy is available with them be doing certain mechanical things or any other thing they are far more efficient than unenlightened person. Some of these dasas also happen to be engineers so well educated who are earlier working but the efficiency is remarkable, very functional in their work they are far more efficient than the unenlightened das but who are also going to become enlightened . So you I'm actually seeing them dealing with them in such a joy to deal such people they can handle any kind of job from driving to anything they can handle accounts they can handle some technical things they can handle give talks, everything they can do perfectly and if the family members come to see them, they'll be very loving and kind everything is there. Of course, otherwise they are in a very very good state and they don't get into conflict with anybody.

So there nothing will happen to you. You need not have that fear at all. You could be pushed into it but we won't allow that to happen before it goes., you have some safety mechanisms are there. Simple it is for us. Bring down the kundalini. Bring down the kundalini you're will not go berserk raise it too fast. Too fast is the key. Then only you become an Aghori and all the stuff and all those things. So there is no such fast raising. The moment we find you're moving fast we slow it down. You do not have to worry at all. So now you'll have to focus from now on the processes which would happen after the M&M classes. This process you can attend only after M&M classes . Dasaa have been trained specifically for that. But this is because we want to make use of more power and the idea is to bring more of the Paramjyothi into you more

and more to imagine you are a bottle to fill in you more and more Paramjyothi you're fully occupied the Paramjyothi then only we can move very very fast very very high so they'll explain to you follow the process and it'll be done only once in a month only after an M&M class, not otherwise. So you have and you completely guided by the dasa. You simply follow that. There's something involved in that which need not be discussed. Simply follow what they tell you. They have been trained and thoroughly tried out for this you'll go through that process. So first you start initially slowly and little by little as you get used to it you step up. This will handle both your lham and your param in a very dramatic way. So the process we are launching today and this process will be done only in the evenings. This next week onwards there also the morning thing will be there. The process will not be done in the mornings. It will be done only at this time. The whole world the whole universe is involved in that time. So that's the time when you go this process. It's now time for the process. So wish you all the best. All the blessings to you. Love you so much.

— ANNIVERSARY GRATITUDE LETTER & CLOSING —

ANNIVERSARY GRATITUDE LETTER FROM DEVOTEES

Ananthakoti father padapramas our dearest Paramjyothi Amma and Bhagwan. Beloved Supreme Avatars, divine father, mother and best friends, padapranams in devotion at your divine lotus feet. How blessed we are being granted to be in Shriama Bhagwan's presence and wish happy anniversary, a day of relationships and your kalyan mahotsav. We want to take a moment to express our heartfelt gratitude Lord for the incredible gift of life you have bestowed upon us. Each day is a precious treasure and we are deeply thankful for the chance to experience the world and all its wonders with you holding our hands and guiding us. Thank you Amma Bhagwan for each day as it is a new opportunity to experience the wonders of your creation and we are grateful for the breath in our lungs the beat in our hearts and the ability to live and love. Thank you Lord for the joy that brightens our days. The challenges that shape our character and the love that enriches our souls, your guidance, presence and the way you hold our hand through it all are a

constant source of strength and we are profoundly grateful for your unwavering support. Thank you Shriamama Bhagwan for helping us experience your divine state. Lord your compassion is beyond anything I can comprehend. Dear Paramjyothi Amma Bhagwan, you have never abandoned us even in our darkest hours and for that we are eternally grateful. Thank you Amma and Bhagwan for helping us understand the value of maintaining a proper relationship with family and friends. This realization has made us appreciate their love, support and companionship bringing immense joy and meaning to our lives. Thank you Amma Bhagwan for enabling us to see the reflection of your unconditional love through them. Their presence during both joyous and challenging times remind us of everlasting care and compassion. Thank you Shriamama Bhagwan. Through your exceptional courses and diksha you have imparted profound values and wisdom to us shaping our character and enriching our lives. We are deeply grateful Amma and Bhagwan for speaking us and guiding us with your wisdom and love through MTI moka classes. Your communication fills our hearts with purpose and direction and we cherish every moment of your divine guidance. How blessed are we to interact with the Lord. Above all, we are grateful for your unwavering presence in our life and for your constant guidance and protection. In times of joy, you are our source of celebration. In times of sorrow, you are our comfort and strength. You are the light that illuminates our path. The beacon of hope that guides us through the darkness. We wish you beloved Shyama and beloved Shri Bhagwan good health. May you be with us for many years in the physical body. We need you. We wish you successful fulfillment of your mission to help humanity. Once again wishing Shriama Bhagwan happy anniversary. Our gratitude has no boundaries. Beloved Shiv Bhagwan with infinite gratitude and immense love. We are ever at your lotus feet.

Sri Bhagavan's Response: Thank you very much for your very kind and loving letter. Love you all. All the blessings to you for a great process. Love you.
