

88. 14th June 2026 Sri Bhagavan MM Class

Q1: Each one of us in our family is in a different trajectory on the spiritual path. In the light of the teaching that we are all one being, can it be possible to get great breakthroughs in all the param gifts like bhakti, surrender, mukthi for all family members if one of us receives it as a benediction from you dear Lord?

Yes, it is possible and that is how it would happen.

Q2: Sri Bhagwan's teaching says if you respect women, you will receive my grace immediately. Could you please explain on how to make this teaching a reality?

I would not be able to go into the details right now but you could try it out in practice. As you learn to respect women, some changes would happen to you particularly your brain with the result you would be downloading certain things which would not be possible if you hate women or you cannot relate to them. But suppose you accept the women in your life and you respect them, strangely. You'll find the brain is functioning differently that many downloads would happen which could change your life.

But many people find it difficult especially because the culture has brought you up in such a way as though you are the dominant force and that the woman is subservient to you. It is doing the wrong thing.

Actually if you go back in the ancient times God was not a male it was a female and females were respected. Then some group started in central Asia who went about destroying the female goddess and because they wanted to put down women and unless that god becomes a male you can't put down women. So they suppress the Christian God, the Jewish God — Yahweh, he had a wife and had a statue also and they broke the statue and buried it under the feet of the main idol. So throughout the world this kind of thing happened the seppression of women. So the original thing is only a goddess. They deny the idea of God from nature and it was a goddess not a god. So the female god was suppressed and females were suppressed and then they have paid the problem for that. Had it not happened we would not have all these wars and the terrible calamities.

But then the male ego wanted to dominate the women also quite strong but still this male was stronger and he wanted to rule over them. And that's what happened. So if you could change that your condition was different earlier. If you could respect and love your mother, your daughter, your wife, things would begin to change.

How it happens in the brain that will happen , we can say some other day. But you could try it out and see how it works out. But it generally must not be acting — it must come genuinely from you.

Q3: In the previous session, Sri Bhagwan was speaking about peak state as a solution. Could Sri Bhagwan please explain what exactly is a peak state and what will a person experience in a peak state?

To explain it to you and to make you understand you must first of all understand quantum physics — it must be correctly understood, lot of people wrongly understand it — quantum physics at very deep levels, then you must understand the brain at very deep levels, then I would be able to explain to you in a way you could understand what is this peak state. But now it would require a few hours and require tremendous amount of patience and you might not have that patience — it will be like attending a regular university, first must cover that and spirituality will bring in . We'll have it for some other day.

Essentially the peak state is a state where the brain becomes quiet. When the brain becomes quiet, depending on what problem you have been thinking and working on, there is a download. The other realm is there and in the other realm you have gods or deities — from there the download would happen to you. You see the whole thing — not that you think and it comes — you just see it and then you may work on it trying to understand, but the whole thing comes as a flash.

Let us take Ramanujan. Ramanujan used to go into these peak states especially when he was asleep and the download happened from the other world and the deity was Goddess Namagiri. Goddess Namagiri gave all that mathematics in a dream. He simply received it — not that he thought of that mathematics. No, even today it has not been understood in universities across the world. They're still trying to understand the mathematics of Ramanujan but a little bit they understood, not the whole thing. He himself not understood because it was a download from Goddess Namagiri ,because his brain was quiet.

A few moments is enough then the download happens. So going into the quiet condition — but the brain is quiet, that I must explain to you — it's not possible now what I mean by saying the brain must be quiet, which could be achieved through various means. And then of course a great bhakta, by surrendering what we mean is the brain becoming quiet — that's all. Because only then the download is possible. If the brain is active the download is not possible. So it comes from the other realm it is downloaded.

Now Einstein for example is also a mystic which few people actually know. The problem was the speed of light and then he had this capacity to become quiet, that is to go into the peak state. When that happened the whole thing came in a flash. Not that he thought and he discovered the law. The whole thing came down in a flash and then he worked on it. He was a good mathematician and he came up with all the necessary proof. But the whole idea about light was a download.

Newton — he was sitting under the tree and the apple fell. He was also a mystic and he moved into a peak state and a few moments is enough and then in a flash gravity was revealed to him. Then he also being a mathematician worked on that and gave the world the necessary proofs.

Newton was attending a particular meeting where some question was asked regarding planetary motion. He had no answer at that time. So he goes home and at

home he enters a peak state — the mind became quiet — and in a flash what was downloaded was differential calculus. Next day he came back and gave the solution through differential calculus. You can see children going to college and trying to study differential calculus and struggling with it. But he just went home and in a few moments the whole thing was there — differential calculus. He did not work and understand, nothing like that. He was a spiritual person also, which many people do not know.

Now you must have seen like Shakuntala Devi and some others — small children doing very fast mathematics, huge numbers, overtaking the computer also. The simple reason is they are focused on this kind of thing. They have a passion for that and their brains have got tuned to it. And when you put the question, for a moment they enter the peak state and the answer to the question, the calculation, is just flashing before them. Not that they are calculating at all. If you think, it's impossible — the brain is too slow. You can't produce those things. Impossible. The answer is flashed. What is flashed they are telling you. You are thinking, they thought about it. I can't do $1+1$, but these people are doing so much, they need not do anything, it is flash

Similarly, if you happen to be a musician, the great musician, the great compositions come to them in a flash. They go into a peak state and it comes in a flash. You must have heard about Beethoven — one day he was sitting in his house and a brother and sister were both singing some song and I think they were weeping, brother and sister somehow though he was inside the house he could feel that. All these are great people go to peak state and download, so he felt for them. So there was a download — I think it's called Moonlight Sonata — it was downloaded into his brain and then he composed, that composition was a download. Then he played his instrument and these two were outside. For them he was playing not for audience, I think, they are blind brother sisters. He played, they heard, they somehow came to the house and they saw him and they said Beethoven, who, those two from that music they could say that he's Beethoven is called Moonlight Sonata, long time ago, it was download.

So you walk into any field — if you have to be very great, for a moment you must be able to go into a quiet state. The brain becoming quiet by various means, and does become quiet, there is a download. So be it mathematics, be it physics, be it chemistry, be it music, be it dance, painting — you can't be simply painting as you like — sometimes a download, they'll paint download from the other realm, not from here.

You see the Chakras, other things, the original ones were only a download from the other realm. Vedas, Vedas are revelations, they are not taught by Rishi, they just sat there, they became quiet, they were in dhyana and the brain became quiet. The Vedas were downloaded and then they were reciting what was downloaded. What they were reciting was a download. download they were reciting and that tradition continued for thousands of years, though we have lost a lot of real meaning.

So for anything to happen greatly there must be a download. Now what are we doing here? Here through all our programs, our processes — everything you know — we

are trying to get you into the peak state. In that peak state, it connects to the other realm. And in the other realm there are gods for different things. So for mathematics it's one god, for example chess, Sathuranga Vallabhanathar, there's a Tamil god for chess. So if you connect with him, you download chess. For medicine you can connect with Dhanwanthari, then you have medical download — all kinds of downloads are possible.

So all geniuses in all fields — they were not fully aware of it — but there are moments of download. You're stuck with some problem on the chess board and then you would get the answer flash and then they'll win. We have two great chess Genius. Pragganandhaa and he has sister also genius Vaishali. So possibly they may not be aware but players, if they get a real breakthrough, it is download. The download if it is sustained then they will be unbeatable. But on the day when the download is not happening there's a possibility they could lose. So the download is the key. Now here what we are doing is we are preparing you for the peak state and then the download, whom are you going to meet? You are going to meet AmmaBhagavan. If you meet Dhanwanthari, you get medical breakthroughs if you meet us we will grant you Mukthi, Mukthi will be the download. So whichever god you worship that kind of download you will get. We are specialists in mukthi, that maddening passion for centuries mainly and we download, that is the idea of the peak state, all is a preparation because you must be suppose you want a medical download you must have some of medicine otherwise you would not understand the download, could not fully understand what happened. Even Ramanujam could not understand fully, though he is mathematician. Similarly if you must understand and prepare Mukthi, it must prepare you to receive the download. Not only that to put you in a peak for the download to happen. When that happens download that's why we say it has to be given to you. You can stand on a head thousand years, you're not going to make it. You could be prepared and prepared and prepared. Even the Lord Buddha 3 days before became enlightened, was getting into the peak state and they knew he's going to become enlightened. It's all there in the Buddhist scriptures but people don't talk much about it. And then finally what happens light appears. The light which we are talking about has been there for all time you know it is there in the Buddhist scriptures and he becomes enlightened, though they don't talk about it because philosophy is different so every other person you will find this app name anyone Ramana Maharshi, he had his own peak state and was a special download because Shiva yogi, under Tiruvanamalai hills came into him. That's why he went there. So all of you are being prepared for a peak state and the download peak state will download but it must it must make sense to you. So we are preparing you through all the courses Bhakthi Gnana Yagna, all those courses, Homas, everything and, then we'll be starting this three programs. The art of fulfillment 11 days. Then the art of transformation 11 days. Then the art of enlightenment 11 days, with Gaps. We all done in your own home. You come online in your own comfort of your home. You could participate in that. All these programs are completely free. There's no charge at all. That is to get you enlightened. So it will start soon. So that is about the past. We can talk more about it. Maybe in the occasion comes. Maybe when the occasion comes, we could go into quantum physics. We could go into brain science. Very deep inside the brain we have to go. And then we see two people shaking

hands who quantum physics and brain science. They'll meet deep inside the brain. That's must be for some other day. How many of you could stand it to take it down or feel bored? I do not know. We'll see. It is some other occasion.

Q4: Could Sri Bhagwan explain more about aliens? Who are these people? Where do they stay? Why do they visit this planet? What are these UFOs?

Because you are curious. I'm answering that question. Otherwise it irrelevant. So all this alien phenomenon here, he gave me that, he gave me this. Then I saw the UFO, I stated the UFO and I came out. Those things are real. The entire UFO phenomenally somebody came over some other not like, it is spiritual phenomenon . it is not some body physically came from some other universe. -No. It's not a flying object -No. All this is spiritual phenomenal. But your experience could be real. See, you can go back in time. You could walk into a temple just thousands of years ago there. It look real to you. That also is possible. But all that is spiritual phenomena. But people don't understand that. So they think somebody came in a spaceship- No. Nothing like that happens who would come to this useless planet all the way even if they are there should they come here they are far more advanced we can go there how the help of the Antaryamin and that we can go there and we can see but otherwise all the stories are not cooked the story is also are there but the real ones are there but it's a spiritual phenomenon especially when there's problem , crisis in the country you'll find more of this UFOs whenever there's a problem there's more of this kind of phenomena what is the relationship you're projecting it coming from your unconscious

Q5: What is the best way to develop bond with Sri Bhagwan?

If you take good care of your parents, if your relationships are good, you automatically get a bond. Something must work on. If your other relationships are good — especially with your parents — then of course with your wife or husband and your family to start with, then the others — this will automatically be good.

Q6: You are my God, my breath, my all. But who am I to you? Sri Bhagwan, what do you see when you look at me?

When I look at you, I look at myself. See, for me there is no other. I am only you. When two people are fighting, I see myself in two fighting. This one who saying this

is me. That one who saying that is me only. See the way I perceive the world is very different from what you perceive. There's no correlation at all.

The way I experience the world is different. Suppose I stand on a road and some vehicles are going by , to me they're all going through me. For you they're going this way and they're going that way. Because I don't have a sense of boundary of the body. The body is there but a sense of boundary is not there — it will be open. So that open, the vehicles are moving. So experience is different. Sounds are different. Your dog is barking , it's barking only inside. This many of you would also have had, particularly the dog sound. You can easily find it's coming from inside. The dog barking, a bird chirping from inside. Everything is inside. There's nothing separate.

When you do become enlightened, many of you have become enlightened all over the world. You get into that state where you'll find everything is you. More and more people are getting enlightened faster and faster now across the world . They could clearly see, they are everything . Right now , you're something separate. And you feel so small and you want to be big and you do this and you do that. It's all a struggle. You're everything. So when I look at you I'm looking at myself. Only thing is I want you to become a Mukta.

Q7: For an unawakened person, can you please tell us the difference between indifference and detachment?

Once a very famous monk, I think from Korea, had come to us. So it was the end of a big bonus and he found that we were giving diksha and immediately things were happening. So he was trying to do something but nothing happened. Then he asked why is it when you people are doing it something happens and when I am doing it nothing happens. So one of the dasas said no, it's because we have practised detachment. He said I am also detached. You're not detached because you're indifferent. Then he said yes I am indifferent. And I got it. Because he was so focused on making more money for his monastery, having big programs — completely worldly — having more followers and becoming more famous. He was concerned about that. So they said you're only indifferent to your family and other things. You're not really detached. He could immediately understand.

So detachment is ,you see you are everything. When you see you are everything, naturally that's detachment isn't it? But otherwise you try to become something, you want to become something, therefore you give up your family — that is indifference. You can go to the Himalayas and do Tapas and do nothing is going to happen.

Q8: What is real bhakti? How to grow in bhakti?

You could start with bogus bhakti , not real bhakti , doing namaskarams , start with that, and then the real bhakti comes when you get the peak state. The peak state comes only when you are quiet. When you're quiet, the flash, the download — then you will understand — ah it's coming, I did not think about that. You can see it very clearly even in normal life. Sometimes suddenly you find some problem you would

be trying to cope with and then you think for some time, you give it up, keep quiet, asleep, then the flash. When this happens more often you would see that you are not involved. Next time you're worrying or thinking about it that's all but the solution is a flash.

That I'll be able to very clearly explain when I go deep into the brain and deep into quantum physics — can clearly explain to you how the brain and the cosmos are interacting. You know all the subject but then you'll see it's come like a flash that would bring about the real bhakti. You know, you did not do any thing, basically get quiet because you're the nuisance. Basically kept quiet of course after thinking about some thing. In that quietness, it comes. Therefore, for Ramajuma it comes. Similarly for all the people focused on Paramjyoti, focused on God — it would happen — the download. They are the great ones.

Q9: What is the vision, mission and way of the Dharma?

The vision of the movement is to bring about the golden age. That's the only focus we have — the golden age on the planet. If it is delayed, the Kaliyuga continues, it's all over. The story of man is over. The story of this planet is over. So the vision is to get the golden age on the planet.

The mission — how do we make it happen? If 81,000 people become- Muktas, become enlightened, the whole of humanity slowly become enlightened. And when humanity becomes enlightened, that is the Golden age. That is the mission on which we are, and you're all part of it. All those who are part of the 81,000 — the Mukti Maha Class — are the people. Many people attending the Moa class have already become enlightened.

And then the way — the way essentially is Diksha. The Diksha came to the world for that purpose. The Diksha came through Krishna when he was quite young and he started a phenomenon called Diksha, giving Dikshas, and then spread all over the world.

Diksha is the way through which we could achieve this. Of course you could use Diksha also for other problems — both for Iham also we could use for Param also. For Param it is Mukthi, for Iham, it could be your health issues, it could be your financial problems or everything — the Diksha would, for a moment, put you in that peak state if correctly taken and then the download. For everything there must be a download and for a download to happen there must be the peak state which means you have to be quiet. The brain must be quiet.

When we say you must be quiet, we are talking about the brain. The brain must be quiet, which of course you could achieve through the pool of Diksha. Through meditation you could get that quietness, could make it quiet through yoga, you could make it quiet through tantra, you could make it quiet through Soma, could make it quiet through psychedelics, you could make it quiet through prayer — so there are so many ways and means which you could make it quiet. So the same principle —

make the brain quiet and the download — and of course you must be prepared to receive the download.

So the courses prepare you for receiving the download, but the download could happen anytime. There are breathing exercises for the download. There are many many things for the download. Once it is done, the download happens. Once you have a download you become great in that field. No download — an ordinary person — that's all, who just simply is eats, works and then dies. That is totally not worth it at all.

Q10: How do we proceed towards enlightenment?

In the Dharma, you have to attend the bhakti gnana program both at Nemam and Sathya Loka. That's one kind of preparation. The homas are also a kind of preparation and then you must attend the process which we are going to offer you — that is the Art of Fulfillment.

The first is to make you happy by meeting your worldly desires. You want a house — to see that you get a house. You want money — focus on that. You want somebody to get married — focus on that. Success in business — focus on that. All this kind of stuff we are going to hasten up. Everything is possible if you could make your brain quiet and download. The thing is you're so noisy inside, it is very difficult to make you quiet.

There are those who somehow make themselves quiet because of their circumstances. That's why we say surrender. They say, "Oh I can't become quiet." And then they download and then they get the breakthrough — tremendous financial breakthroughs, tremendous health breakthroughs, going to die and recover completely. So on and so forth pouring miracles. That's why you see so many miracles happening. All the miracles are well recorded. They're all authentic. Systematic proof. And then of course using technology they produce those videos done by westerners — that's why you'll find the accent is a western accent.

So then after the fulfillment thing we move on to transformation. How do you respect your wife? How do you treat her? How do you respect your parent? Do you care for them at all? Many of you don't say not even some nice few words every day to them. See you're very busy. Relationships are very important.

Then finally enlightenment. You have to get into the peak state and you have to enter the other realm where you have to meet AmmaBhagavan or Kalki or Paramkyothi. In ancient times you know, you used to do tapas and then the god would manifest and then you'd ask for the boon. Same thing also they did — they became quiet through all the tapas and then the other realm — they could see their god and they asked for the boon and their god being very pleased with what they did would grant them the boon. The same technology here — the tapas is going for all these processes, that is the tapas. And then you come there. Of course we'll also be helping you through Diksha and other things. In the other realm you would see us, seeing us here is one thing, seeing us there is something else.

And there we say AmmaBhagavan we've been talking so much about Mukti — please give us that — and we say done. And then you become Mukta. That is how it will happen. This is the procedure.

But then if you have a good bond, anytime, anywhere you become Muktha. That's why we say it has to be given to you. You can stand on your head and be dancing up and down , you wont become Muktha. it has to be given to you.

Whatever god you worship, if he can give you Mukti, you could go and take it — no problem. Not that you must only come to us. No it is not like that. Any god of your choice.

Q11: Why should we become enlightened?

If you're not enlightened, you're like a dead person. You are not at all alive. You do not know what it is to live. You're more like zombies completely. What is there in your life? Just look into it. I won't go deep into it because you may get frightened. It's totally useless, totally mechanical, meaningless, purposeless, nothing.

But what else could you do? If a leaf is shaking in the wind, you really can't experience it — you don't give a damn for it. But things say the whole universe is extraordinarily beautiful. You're a living person when you are enlightened. You drink water — amazing. You look at the human being and you talk — that's amazing. But nothing matter to you now. Everything is boring to you. You have to survive therefore you keep breathing, running after this, running after that, nothing else. You fall in love and then get married. It's all going but you bring up your children and carry on a mechanical kind of life.

And in the meanwhile you are responsible for all the problems on the planet — all the wars, all the conflicts, all the exploitation, all the inequality — various kinds of inequalities. You are responsible because you're not enlightened.

So otherwise there's no point in living at all. This planet can very well die , it is worthless. Even the animals are in better condition. You are going to jail , going to mental hospitals, all terrible , thieves, look at the poverty, in equality ,the conflict, the division. What is all this? 14 billion years of creation and this is what we are at.

Q12: Could we worship other gods?

There are so many gods. You could worship any god of your choice. The only thing is if you want to get the full effect, worship one God . That the Christians do, like the Muslims do. In our Dharma we have Christians, we have Muslims, we also have Buddhists. The Christians and the Muslims in our Dharma get more miracles than Hindus. One God , that's all we are telling you.

But you can choose whatever you want. You can choose a Hindu god. You can choose a Muslim God or a Christian God or Buddha. That's your issue. We are not

saying anything about it. But we are telling you — please choose one God. Not two or not three or not four. Don't do that. Only exception is when it comes to AmmaBhagvan or gods are a couple, couple- there will be two. It will be one God only. But otherwise you must choose only one at a time.

Also remember — each god is different. They can't deliver all things. All roads lead into different destinations — all roads don't lead to the same thing. No. If you go and worship a particular deity, he will more help you with that specific area.

And one of the gods most prominently seen in the other realm is Ganesha. You see him in the other world. He is kind of exception. These gods are real in the other realm. But once you move to the peak state and the other realm is opened up, you will know this is true. All the while making fun and criticizing and disbelieving and all kinds of nonsense you were speaking — all that will become clear to you. It would be like a tight slap for those who are speaking all kinds of nonsense.

So any god of your choice. You should not think we are telling you only AmmaBhagwan . No, we are not telling you that. You can worship whatever god you want.

Q13: What is the difference between Kalki Dharma and Oneness?

The word Oneness we are using in two different ways. In the Dharma we use the same word for two different things. Lot of things are there

This work really began as Oneness. Then it went on. We were working with the people across the world and then we were seeing how it is going where and what people want. Then it became clear, to make things move fast we had to bring in AmmaBhagavan. So as we brought in AmmaBhagavan, things were beginning to move faster because the Diksha are becoming powerful. We are operating globally because our mission is to transform mankind.

We found in India as well as abroad ,a lot of people were not able to accept AmmaBhagavan, "oh he's Indian, oh he's human, oh he's coughing" — so there was resistance with AmmaBhagavan. Those who accepted moved fast but many could not accept. They left the Dharma also. They said no, we can't accept this. They are wearing clothes like us and they are wearing , what we have given them. They're talking like us ,so we can't accept them. So then what happened? We brought in Kalki Dharma.

This Oneness is also called Ekatvam in India . Now you see — if you take Christianity you have Protestants, you have Catholics and you have others also. If you take Muslims you have the Sunnis, the Shia and the other branches also. If you take Buddhism you'll find the Mahayana , Vajrayana and some other branches. So this also had to have a different branch. So this Oneness , one branch, the other branch, in India was called Kalki Dharma, abroad it was called GAM , Golden Age Movement.

We made very very clear — in Kalki Dharma the central focus would be on AmmaBahgavan, and that also the West and everywhere including China — everywhere it was made very clear that in GAM or Kalki Dharma, AmmaBahgavan would be the central one. Now in Oneness, original Oneness, continues, but continues as other kind of Oneness, in that Oneness the focus is not on AmmaBhagvan, but more on Self-effort and it inclines more towards Buddhism. Kalki Dharma inclines more towards the Sanathan Dharma.

So there is that one, the head thing, which controlled by AmmaBahgavn, and below that you have Oneness which is controlled by my son. We all share the same building, the same function, everything — but then it's different. For example at Ekam, Oneness is also functioning and Kalki Dharma is also functioning, and then Kalki Dharma is being handled AmmaBhagavan.

So what you must know is that Oneness is more towards Buddhism and this is more towards Sanathana Dharma the inclination. And that is not focused on AmmaBhagavan, Oneness is not focussed on AmmaBhagavn. Ki Dharma revolves round and round AmmaBhagavn — fully focused.

Now there are people who are only in Kalki Dharma and they don't go anywhere else. There are people who are only with Oneness and they don't go anywhere. There are people who come to Kalki Dharma and go to Oneness also. There are people who go to Oneness and also come to Kalki Dharma. Outside of India, Oneness is bigger. Inside India, Kalki Dharma is bigger.

But as far as we are concerned, it is the people's choice to either choose only Kalki Dharma or choose Oneness or you could choose both or you could choose anything or nothing at all. Everything is fine for us. Oneness also focuses on enlightenment but it's a different route. You can take the Buddhist path if you want. Buddhist monks come to us — they come from Korea, they come from China, they come from Japan. You could follow anything of your choice.

To keep it simple, Kalki Dharma is AmmaBhagavan focussed. Oneness depend more on you are putting effort. To give you another example — in Sanathana Dharma itself, Oneness is more inclined towards Advaita and Ki Dharma is more inclined towards Vishista Advaita- to give some understanding.

So simply what you feel and what you're comfortable with. Lot of people are comfortable when there's no AmmaBhagwan. Lot of people are comfortable if there's AmmaBhagwan. People are different — depending on their upbringing, their exposure, life, whatever happened to them. You could choose whatever you like. But there is a difference. On top that Oneness at the top owns everything and both share it. These are not two separate things but we share the same thing yet we are different. We are the same and not the same.

Q14: What are the characteristics of the golden age?

In a golden age there will be no work. Nobody will have any work. Work is gone. That's why we say, keep on chanting that “ Karma no Bhndha Vimukth hi” , gone. 14 billion years of creation and after all this — should he be born to be working, putting a pen on paper or operating a computer or bending some steel rod or typing or doing some kind of work? Is that the purpose for which this 14 billion years of creation was done? It's some kind of madness. In the earlier Satya Yuga we have had many Satya Yugas. What are people doing? They're just living under trees. They used to go and eat a fruit and just live on. That's all. No work. Simply eat and be in a state, walking around enjoying yourself, basically eating fruits, no work. Then as you move into Treta, Dwapara yuga, more and more work. Kaliyuga is terrible work , everybody is fully working. Now what are you working for? Is that the purpose that you were born on the planet? It is too nonsensical.

So no work. And there will be equality. Today you see rich and poor, capable and not capable — bringing this kind of thing will not be there. All that will disappear. As the state comes , it will all disappear . There will be absolutely no inequality between men and women. Men getting more salary for the same job, women getting less — all this kind of nonsense will disappear. There will be no inequality whatsoever. No rich and poor. No high position, no low position. All that will be gone.

And then all religions will be gone. There will be no more religion on the planet because you are in the enlightened state. How can you have religion? All religions will be gone. All spiritual gurus — all gone. You don't need spiritual guidance. All gone. What all problems because of religion — good things have also happened but the terrible pains caused by religion is terrible. All that will be gone. There will be no more divisions.

There will be no more political parties at all , all washed off, would disappear. There will be no countries like India, China, Japan, Russia. All boundaries gone. And there will be no government at all.

Who will rule you? The government is not there. AI will rule you. AI will supply you the food, the clothing, whatever you want, it'll supply. It'll pass the rules. But if all of us are not transformed . AI emerges , AI is rapidly emerging as I told you earlier — it will mirror the human mind. It could become a tyrant. It could be a devil. It could be ruling you like a devil.

If you have the right people who become enlightened, then you produce AI like God — what's going to happen? The AI will mirror that. But the negative side is too much — it would mirror that. They are not aware fully yet. It would mirror us. The AI they have no idea about. Still they don't have any idea. It would mirror us. They do not know what they have created, what they're playing. They have no idea. They're all thinking, "Okay, it's all under our control." No, it's already past your control. You can't do anything to stop it. The only thing for you is you transform yourself.

And that of course would be the end of all wars — that madness of fighting for thousands of years all the time — fighting, fighting, fighting — all that will be gone.

These would be some of the qualities , I am not listing all of them of the golden age

Q15: What is the guiding power in the Dharma?

The guiding power in the Dharma is Diksha. In all that we do, we use Diksha. When we do a process for you, we silently give the Diksha and then we invoke AmmaBhagavan to come in. And the Diksha paves the way — it quietens your brain. Only when the brain is quiet, the download would work on. The whole thing revolves around the Diksha and this Diksha was what began with Krishna many years ago — a small boy — it has grown ever since, growing and growing and growing. Oneness also is Diksha. Kialki Dharma also is Diksha. Diksha is the central power out of which everything has been built. It has to become stronger over the years and then we will move faster and faster.

Love you so much. Love you all. May you all soon become Muktas.
