

SRI BHAGAVAN

MM Class — Q & A Session

57. 26th November 2023

Verbatim Transcript

— SRI BHAGAVAN'S OPENING ADDRESS —

SRI BHAGAVAN

So I am very happy to talk to all of you today. Today is a very very important day. Now this dharma is in its 34th year and its objective has always been to enlighten mankind and we sometimes say to end human suffering and we also say to set man totally and unconditionally free. We use different kinds of phrases. The simplest thing is to give enlightenment to people. So we had a deadline in 2012 and we worked for that and we failed. For some people did become enlightened who continue to live until now enlightened but we could not reach those numbers. They were 64,000 at that time but we could get nowhere near that because our process is just not enlightenment for a small number of people. No, that's not our goal. That's not our vision. So the whole of humanity, nothing less than that. So the whole of humanity. So we failed.

Then of course the work is based on some revelations. I would not go into that. And then the date was around 2024. we have to get. Now the number was 81,000 not 64,000 now it became 81,000 because it depends upon the human population for every 100,000 we need one person ,now the way things are going it looks like the murta for this is January 15th if by January 15th we have 81,000 people 81,000 who have made it made it means they must be able to move to Ananda at will and be able to transfer Ananda to anybody on the planet at will. Besides also pray to people to have their problem solved that he is a warrior of this 81,000 we call this 81,000 army. We also call it the Paramjyothi Kalki army. In the western countries it's mostly called

Paramjyothi Kalki army. Now that is the qualification to be a member of the army not merely registering for that. Now if we had that many people let us say on January the 15th by 16th mankind could be in a different state. The whole of humanity could be in a different state. It would have just jumped into a different state. And that would be the end of human suffering.

But despite whatever we could do, we seem to be nowhere near that. Our numbers globally today is 35,000. We need 81,000. We are at 35,000. If next year the population grows, we need more. So currently it's only 81,000. And the numbers that we have that the registered number of people is 35,000 of whom only 10,000 attend the program. This M&M class is the main area where we work on them to become that though we have a lot of support systems like Havans , the process and many things are there but the main area where we are working is the M&M class. It's called differently abroad. Here in India, we call it the M&M class because the concept of moksha is not known to them. So the actual attendance is only 25,000. The registered numbers are 35 globally and globally those who attend are only 25,000. In that 25,000 five thousand have made it. That is where we stand today. But we seem to be growing faster now. But even then it may not have 81,000 and you may not have 81,000 people who have made it. So it is most likely it would happen. So we just can't give up like that. 34 years of work has gone into that and before that 850 years have gone into it. So much has has gone into all this and Ramalinga has worked very very hard for this many other souls involved. So we can't just let it go like that.

The other is plan C which we should have started after January the 15th but we thought we will not wait until then. will initiate that before that date itself. So that on that date there could be a jump in the state not the state of humanity but the state of the warriors. You people are the warriors. So a month ago itself we started in fact more than a month about two months ago we started this process. What is the process? give you the state of Ananda and through prayer we switched over from diksha to prayer the moment we switched over from dika to prayer it became immensely powerful now the

whole world they moved into prayer. now it's very very powerful so once we moved over to prayer and we could give diksha to the people sorry we could give Ananda to the people we found that we are able to transfer this state. And not only that, it was becoming more and more powerful by the day. Every day it was becoming more and more powerful. Nemam was the main place from which we were delivering people to the world. And Nemam the power grows every day. For example, yesterday the power was one thing and today the power is different. Today's power was more than yesterday's power. It keeps growing and growing and growing, this power. Now what we would be doing is now in this M&M class every month we meet we'll increase the power. I'm using the secular words like power. The actual word should be grace but most people most people are comfortable secular terms they like to avoid spiritual terms. So I'm going by that.

So the power would be increased for you in transferring the state that you understand you do not transfer the transfer is done through diksha which is given by Paramjyothi to be very specific it will be Paramjyothi Kalki now when we do vishwaguru programs we say Paramjyothi Shiva we say Paramjyothi Krishna we say Paramjyothi Kanakadurgamma we say Paramjyothi Andal We say Paramjyothi so many gods are there so many gods of which we do not even know for example in Nemam somebody came to us and we asked him you get connected to your god and tell us and the person said our god's name is Maduraviran now later on he came no people know that but we did not know we never heard of a god called Maduraviran so of course we said now we add the prefix Paramjyothi Maduraviran and see how things happen and then things began to happen. So we go on adding the prefix Paramjyothi then the name of the god. Now though Paramjyothi is added to everything once you add that name it would function accordingly. Like if you have an actor he could act on multiple roles. You tell them you must act in this role. He would act in that role the actor or the actress or whatever you want. Similarly Paramjyothi must be told you must be like this accordingly would function. So let us say , Paramjyothi Vinayaka, it will function like that. Let us say Paramjyothi Kanakadurgamma , it will function like .So here Kalki has to be

Kalki. Kalki's purpose is to give mukthi to mankind. It is to remove them from all suffering and to move them into very high stage much beyond enlightenment. So all that Kalki will do. Now if you bring in Paramjyothi Rama it won't work like that. It will a different purpose . Paramjyothi Krishna it a different purpose. So that is why here you should be able to connect with Paramjyothi Kalki through all these years. You could have built up a bond. That bond is key, very important. How would the bond come? You must read the miracles that are constantly being posted. As you go on reading those miracles, a bond will develop. That bond is important.

And when the bond is depending on the bond you have to pray, suppose you are to pray to your father, it will do one thing, to your mother, it to your uncle, it could be different. So it depends upon what kind of a bond you have and how important that bond is for you. Within that framework you have to ask , prayer is nothing but asking. What would first you would move into that Ananda state of yourself one we have received several fruits the last few years. One has been soma a very powerful tool. So you can drink the soma and you'll get the Ananda or after some time no need for a soma also just you think of Kalki and immediately Ananda would come or think of the last time you had Ananda it would come and once it comes then you have pray asking that this state of Ananda must be transferred to so and so now here you must be clear you give to one person directly sitting in front of a person you could give. You can give to 100 people. You could give now you could do a program it is say online where on the other side there are thousand people gathered you could do. So may not be physically there online you could do. Suppose now you're not able to do on the phone nothing no problem without seeing them you can do anybody anywhere on the planet now when you do that you have to have a mental image of that person that is the address to which the transfer must be done that person's image you would hold and you would say Paramjyothi Kalki or simply Kalki please transfer this Ananda to that person holding an image suppose image also you're not able to hold you forgotten the image of the person or you're incapable of visualizing the image then feel for the person feel for the person and say Kalki or Paramjyothi please transfer

this Ananda to that person it would go, you could be in Bangalore Hyderabad Chennai or Delhi you could go to it could go to somebody in Moscow or Beijing or even north pole or south. Anywhere, space does not matter. Anywhere you could be, anywhere the other person could be. Time does not matter. Could be daytime, morning, night, evening, any time you could.

Space and time do not matter. And any number does not matter. But the if one person giving then you could give to a maximum of 100,000 people after the number exceeds 100,000 the power would slowly start declining. So in which case there must be two or three people join there are three lakh people three people together could do it. So that is how you can go on transferring and they could be Buddhists, Hindus, Christians, Muslims, atheist, communists, they could be in jail, they could be crooks, bandits, rogues, cheats, horrible people, no problem. Very horrible murderer crook. A terrorist can bomb him with Ananda, all of that and he have the effect. No judgment at all. Whoever the other person is, whatever the other person is. But how much he would receive that of course would depend on him on his karmas and other factors and upon the one who praying it depends also on you. If you have a good bond it's very powerful. If you have a weak bond it will not be so powerful. So both factors are involved. But as you go on doing this immediately your state also would go on increasing. Now once you pray for this transfer if the transfer has been done what is the proof your own Ananda would go up it will show Ananda come more that is the proof it has been transferred now as you go on doing this to more and more people day after day or month after month your own power transfer will be growing and growing and growing, your own Ananda will be growing and growing and growing so it something keeps growing and of course as it keeps growing more and more things would open up about which I'm not talking except one thing I'll tell you soon the Ananda would also be transferring causeless love simply love for no reason . You all know love but that is abusive kind of love so a love of the self is involved and where some agenda is there so not this kind of love is not at all love so we don't talk about that or a boy falling in love with a girl not that kind of love so

this is simply a causeless love which has to be experienced. Now this Ananda start delivering that also.

Some people may get some siddhis also in due course. Some people for example yesterday we transferred to a lot of people western people and quite a few of them developed siddhis also. Siddhis like look at food you can taste that food without touching the food eating the food exactly taste it so different kinds of siddhis came about different kinds of it's not the goal but they are like some kind of what should I siddhis are side effects they're not the main thing it be there and besides a lot of people had powerful OBEs traveling through many Lokhas and seeing closely how those Lokhas and their entire perception changing. Their ideas of perception and time changed, cause and effect change, all that we teach you, they become real to them. Now they could see, oh my god, the past, the present and the future all running concurrently that is such madness to talk about a past and a future. It's all concurrent. They could see that, actually see it and, actually experience it. That also opened up yesterday. Yesterday was the first time we released it to them and today we are coming to the Indians or the Hindus because yesterday's people were Christians and Muslims and Buddhists they were like that and some of those westerners are also Hindus. So now all that would happen in due course and of course they had happened the very first day itself.

So this we would be we have been activating for those who come to Nemam and those who have come for the Homas in Satyalokha but today we'll be activating for those who did not come and for those who have come there will be more activation what do we activate the state of Ananda come more and would be growing and growing that we are going to do today after I have spoken and taken the questions the process it should be activated and then most importantly the power of transfer you effectively praying to Kalki and having a transfer done Kalki does it dikshaa. Kalki is global so anywhere on earth you can give the dika and so powerful that the person would immediately see the effect so these people who came yesterday the process

immediate they had to give three people and some gave for more people and immediately and remember when you transfer after this process is most likely to have zero time. That is you take up one man and you pray and say please transfer before you complete transfer is done. It is instantaneous. Kalki does not need the time at all. So he knows everything. So as you start the process begins there. Before you complete it's done. You can do an experiment and you can check out . You do that process for some time and then you could make a phone call and check out and you would see whether there was a time lapse. There would be no time lapse so fast and that person could be anywhere on the planet and suppose you, he happens to be your friend or somebody who spaceship traveling on top of the world. You could transfer to somebody on a spaceship which could transfer to somebody in a submarine. You could transfer to somebody in an airplane, somebody driving a bus. You could also be traveling. Your traveling is of no consequence. The person to whom you want to transfer is of no consequence. There could be old people. They could be young people. They could be middle-aged people. They could be sick people. They could be healthy people. Of course, a certain amount of health is required for you to effectively experience a state and to transfer. So for that we do the process today. maybe some special effects of the body that we'll be doing for you in today's process and then setting right those things thereafter you have to go on helping others depending on your capacity. Suppose you can influence 100 people do it for them.

So this will be during the M&M class we will be activating and increasing the power of transfer of the depth of your state and on every Saturday the dasas will be conducting the deepening process where your state will be deepened more and more deeper as you go deeper and deeper we could be transferring many more things we are beginning with Ananda, a base state we'll be going more and more and more to so many other states . We'll be going to all that the teachings have spoken All that would become your reality. Past lives. Yes, you go and see your past lives. You see the future of the earth. All this will be happening automatically. We are not going to focus on that right away. But sometimes it is happening. But later on in a very precise way you'll be doing

it. We'll be taking you to the other worlds making you meet other gods. You'll be astonished to find you have these Vigrahas in temples, ancient temples, Vigrahas and the gods up there in other world are exactly like those Vigrahas , because how were they done? Olden times the sculptor after ritual I myself checked some people they go to the other world meet the god and then have a mental picture of the god even check their palms everything and see the fingerprints everything you'll find many of these idols have fingerprints and then they come back here then they sculpt it out so such sculptors are very rare now, very few are there and . Nowadays what they make is the copy of that like a photocopy they're copying those original images that's what is being done with some slight modifications but otherwise it's a copy of that the original . The original is the actual that's how they are in other worlds how do you know like that I asked the sculptor to go to Satyloka and , there is door frame there and I told him get me that door frame the bottom of the door frame he could do it exactly in 48 days . and it's still at Satyloka. So there are of course his son is a modern day engineer so he he's not able to do all those things but his father was doing this. So that's why they first make the idol, install the idol and then build this super structure which involves a great deal of mathematics and then of course invoke that god that god is actually living there to come occupy this idol and that's why you'll find that they'll always be tying up the eyes with a cloth and then finally there after chanting they'll hold the mirror front of the vighram and they'll open the eyes and the mirror will be blown to pieces that's when the idol is occupied by the god up there. So it's an exact replica. It does not correspond to God won't occupy that. But today for us it's much much more easier because you are the photograph. So we come into the photograph. So now you can go and check up where all these gods are really there. You can go and check up and see how Anjaneya really looks like. You could go and check out on Rama does really look like what's spoken or if like your calendar Rama you can check out or your Krishna you can check out. Everything you can do but that would not be our focus that would be happening. Maybe sometimes just for some clarity we might take you and show them there.

So all this is part of the journey so that your perception changes and as the perception changes you tremendously change inside, which means there will be more and more powerful transfers to people to you humanity for us. So this 81,000 people are the people who will deliver this. Now your question could be if tomorrow 100,000 people come all they become warriors. No whatever the number which comes in it will only be 81,000 or 91,000 or 71,000 depending on population automatically be adjusting itself. Only that many people will have the power to get this transfer done. Not everyone. That's how nature functions, like you have so many birds so many are automatically twins so many twins automatically so many triplets so many triplets the same thing you can see in nature very closely the same way given this population is 81,000 you suppose 100,000 will come no after 81,000 no they'll get some nice state but they would not be able to transfer that is not what . You are those chosen people would have the power. So you need not judge yourself. You could be the most useless person does not matter. You'll be bogged. We will not be judging you. As long as you have the passion, you'll get the power and with that power, you will be able to help anybody on the planet.

So you people will have to see that a very large section of the population gets this Ananda by 2025 December. If you and I think it should be quite easy to get there already our people are transferring left, right and center . Large numbers of people there speed and if you could do that to a large number of people I won't tell you the number but large number of people then by end of 2025 , we would everybody would be very clear on the planet that we have solidly laid the foundation for the golden age. Thereafter, it's only the unfolding of the golden age. A golden age where there's absolutely no poverty. Nobody would cause another to suffer. You just cannot do it. It'll be a very very different world. It will be begin to unfold from 2026 onwards. And in the meanwhile, India would rise to be a very great country. Its time has come and it could rise to be a very great country. All that could start happening if you could transfer this to other people. You must take it very seriously and set apart sometime every day to transfer to two or three people. But today

after the process immediately after the process you must transfer to three people only then the whole thing will be initiated.

So today itself you have to start because some of you might be already be doing it but even then today after the process you must do it, today if you had come to Neam and done it still you must do it now after the process >Now we go to this pournima day this other special day. so I think tomorrow or so on Pournima full moon day we will be giving you AmmaBhagwan's worldly state .So you must know Ammabhagavan in the world because you can see me I'm talking to you. Then you also know that we have Kalki Bhagavan, Kalki Bhagavati who are in the other dimension like the gods that you see we are the other dimension there so for the transfer you'll be praying to Kalki Bhagavathi and Kalki Bhagawan you see that mantra where it should not be Bhagati Bhagawan alone, it should be Kalki Bhagavathi and Kalki Bhagawan that is the mantra to get in the transfer of the state that you must chant three times. Now what you do is here and then we have Ammabhagavan in this world and you might be wondering how do AmmaBhagavan perceive this world, how is it . So tomorrow the full moon day we will be transferring that state to you to the extent possible how do Ammabhagavan live actually in the world how do they react to situations . We are also seeing the same thing as you are seeing but how are we responding to it how are we reacting to it ,how do we think about it. That state would be transferred to you at least for a short time it would be transferred to you.

And you will have to form groups of nine people. Many people number of people your group it is nine people and nine of you should come to understanding that you transfer this state this Ammabhagavan state to three leaders in any field but Indians. Different for different countries it is different so but they could be in the political field they could be in the medical field, they could be in the economic field or any field, three leaders, you could transfer this state to them. The same method, the prayer method, it will go to them. So you would be transforming the leaders. So many of you are there and in Nine , Nine, Nine groups and each group has leaders to transform the

world will transform. You could transform send it to lot of big medical doctors who then can impact the medical profession, send it to police chiefs, police force can be transformed some politicians, the police system can change. So you can be bombing the leaders. So pournami days for bombing the leaders in whatever field they are. For you you'll get that state but the bombing has done for the leaders as if bomb them so much can happen no in the country you'll dramatically change or top flight engineers bomb them they get very great breakthroughs all that would happen you may not feel bad or jealous because you also get the state but you should do it for them transform if you transform the leaders you can transform the country fast . The leaders are terrible very difficult to transform a country down the line it will percolate. So that is your other days you'll be transferring to all kinds of people. So you are basically transmitters. You are transmitters for transformation. Your prayer is happening. Therefore you are transmitters and to do that you must already be in that state. Only then it would really work. So on full moon day you will work on the leaders of the country. But these nine people must come to an understanding and agreement that we will transform these three people. We will affect these three people. There there should be a consent you would agree and on that day you could be in your own homes but at a specific particular time 8:00 or 8:30 at that time focus on those three people and they have the picture in the mind or on the TV on the phone or on some paper also picture ,then do it all must do let us say if you do it for 5 minutes all at the same time then it will work and that leader you not know you have done . But you'll begin to change. You will no more be a narrow person. You'll be completely you'll become world centric, humanity centric. All that will naturally happen to him. He'll be concerned about others. He'll be other cantered. Everything will start happening to him. That will affect his work and then everything will be will begin to change.

So that is what you have to do on a full moon day. So this is the role you have to play because you have voluntarily become members of the Kalki army. Though you have to qualify of course about 5,000 people globally have qualified. So we can all quickly qualify now that you're stepping up the power

now. Quickly we at least we should be able to get this 25,000 across the globe. the 35,000 should be qualified 10,000 don't not even attend but I think we could bomb them also and transform them and make it 35,000 army is quite good only but then it'll grow that 81,000 the power would be unimaginable. It very very quickly though we had missed 24 January 2024 got better in 2 years time we would have had a great impact on humanity across the world we would have we nowadays we find Christians are cooperating with us, Muslims are cooperating with us Jews are cooperating with us so many people from many parts of the world are cooperating and because effect is immediate you don't have to wait for the effect no immediate and irrespective of who you are if you are somebody who is a non cooperative no We simply give it to you. That's why you won't even know we are the Ananda goes bang into you. So that is the power you'll be having after some of you already have the power. Those who come for the homa and the process they've been given. Today also some people have been given and those who not come would be given today and every month we'll be increasing it and during the month also it would be increasing as you go on giving but specifically on these occasions it would be increased and you would be your own state would be growing and growing that is the reward for you. The first we'll be focusing on Ananda other things can hold on later. So more and more that is your natural state.

If you do not have Ananda there's no need for you to live at all. You're mere waste products. Waste products on the planet. A burden on the planet. Miserable beings, who just pull on just because they're afraid to die. Cling to your property, cling to your name, fame or your qualifications or your money or wealth or your family. Well, absolutely no love there. But then you feel some kind of love, attachment, attachment, you mistake for love. You don't know what true love is. It is some kind of existence. I find that the animals and birds are in a better shape than you because it's the less of the mind among them than you. So you the torture is your mind. The mind is the big donkey which you are carrying. The donkey is required no doubt but you must ride on the donkey not the donkey is riding on you you're carrying the donkey on

your head and you feel very proud of it not realizing the donkey is taking you for a ride but you put the donkey down and you must ride on it, that is Ananda where you look at the mind like that young man was talking how his mother sees Ananda the mind it's a second person's mind not her mind it will be so real and so classical that the mind is not yours but it is there you need that for the surviving on the planet no but it's no more your mind so all this will become very very clear to you as more and more time you spend in Ananda the another begin to expand and show you new dimensions of life, new dimensions of God, everything will keep changing. I was God I use the word in a different sense. So now I would go into your questions.

— QUESTIONS & ANSWERS —

Q1 | First question. What is nothingness?

SRI BHAGAVAN

What is there is nothingness. All that is there is only nothingness. But nothingness is the unknown and the unknowable. Unknowable because at no stage can you know it. Simply unknown is today unknown, tomorrow it could be known. But unknowable means how do you know? You know through your mind. Mind can never grasp it. It's unknowable. Nor could your senses grasp it. Either way it is the unknown and the unknowable. So that is why but that is the basis. Everything has come out of nothingness only. All that you see and perceive and experience everything has come out of nothingness. That is why it is the great Maya. It's come out of nothingness.

And if you go to Ekam you'll find on the top floor you'll find a throne there which is mostly kept empty. And occasionally of course I and Amma sit on the throne for some particular purpose or sometimes our photo is kept there for some particular ritual. But essentially the throne is empty. What is the highest? The highest is nothingness or from which everything has come. Everything goes inside nothingness and everything comes out of

nothingness. How that happens? That is the unknown and the unknowable. But you can experience it as you move to nothingness. Those last few moments before you move into it that could be experienced. Similarly when you come out those few moments at the beginning that could be experienced the process for that which you would give you later on you could experience that and you know that is the unknown and the unknowable and the symbol for that at a Simhasan there which is empty, nobody sitting there. That is highest the unknown and the unknowable. Then afterwards comes the Hiranyagarbha which is the entire universe which comes out of the unknown out of the unknowable out of nothingness and to go back into that can be experienced clearly. So we cannot speak anything about nothingness. You can say nothing is there that's all. But when nothing is there but is there anything that we cannot talk nor can we take the stand that there's absolutely nothing there, because we have no idea about it. We don't have the tools to perceive it. So we only keep quiet and say it is unknown and unknowable. Whether there's something there who knows ? ,we as far as we are concerned it's unknown. and all that is the basis.

Q2 | Sri Bhagwan. Who is a Bhagavan and how to get that title?

SRI BHAGAVAN

There are many qualifications required to be a Bhagwan. I will not go into all the details. Simply it is like this. If someone whom you think of that person as your guru or god or whatever it is and that person is able to do miracles for you then you have a tendency to call that person bhagavan. So Bhagavan is a name that is given by people small number large number people call Bhagavan because they have had miracles. Normally when somebody does a miracle for directly do a miracle for you, you would call that person Bhagavan. That's why there are many Bhagavans are there. Many Bhagavans have done miracles for their people and they may not be very famous but people call them Bhagavan only and if they happen to be female sometimes, they call the female also with the name Bhagavan or they use the word Bhagavati. So that's given by the people. There's no academy or institution which will give the title

Bhagavan. It's given by the people from their own experience of the person they would give it. I got the name Bhagwan from Somangalam, the place where we began the work as they began to experiences and miracles they said Bhagavan it got stuck and they said Kalki Bhagavan and that got stuck.

Q3 | Bhagwan. What is Sanatana Dharma? Will it survive?

SRI BHAGAVAN

To help you understand easily there are these Abrahamic faiths ,Judaism, Christianity, Islam. The first person there to worship God was a person called Abraham. So the God that Abraham worshiped was the same God which later on Moses worshiped for whom that God gave his name as Yahweh which means I am what I am. That's the meaning of that the Jewish language. And that God which Moses worshiped that was the same God which the Lord Jesus Christ worshiped. The God that the Lord Jesus Christ worshiped was the same God which the prophet Mammad worshiped. They all worshiped the same God and they called a group of Abrahamic religions. It happened in the Middle East. Middle East when all the problems are going on now. So there's something very interesting here. Suppose we have a map of the world and then we take the human brain out and we open it up and put it on that map size map. You put the brain on that. There's a part of the brain which deals with God that exactly falls where the Middle East is. There's a part of the brain which deals with enlightenment and similar things that falls over China and Japan. And there's a part of the brain that deals with order that falls over Germany. There's a part of the brain that deals with emotions and music that was where Africa is. So you'll find a strange correlation. So these Abrahamic religions all worshipping the same god only are all from the Middle East.

Now they do not accept anything else. The Jews would not accept anybody anything else. Chosen people. Similarly the Christians would not accept anybody else. Muslims would not accept anything else. They will not accept anything else other than their own faith. There's total nonacceptance.

Anything else and there's no freedom for you. The law is there. The Jewish law is there. The Christian teaching is there. You can't bypass that. Islam, you can't bypass an inch. It's all there. Now think of something else where there is a complete freedom, and there's no force for you to follow this or follow that. That is Sanathana dharma. So other than these three faiths what else is there?, all that is Sanathana dharma only. Wherever you go, whether it is Shintoism of Japan is Sanathan dharma ,for example I think this month or time is probably next month we will be doing our vishwaguru programs in Shinto temples in Japanese Shinto temples we'll be doing our vishwaguru program now very often this Sanathan dharma is also called Hinduism so if you go to North America there are many of these religious groups are separate , separate groups. They have their own leaders. So, Central America, South America, most of them have come, they have met me personally and we have spoken and it is very similar to what we believe in very close to that. But there different there are differences also and they are different and I asked them why have you come here for what purpose to India? One they said to come and see you. The other is we have come to attend a VHP conference. VHP is Vishva Hindu Parishad conference. They have come all the way from North America, Central America, South America. And who are you people? They are Hindus. They freely say we are Hindus. Similarly, if you go to Sweden, there's a mountain called OM mountain where you find they doing rituals. They're ancient Swedish people. So you find plenty of this in Africa. All the African religions are all Sanathan dharma . Other than these three,

anything else is Sanathan dharma . And suppose you say there's no God. I don't believe all these rubbish and nonsense then also you are Sanathan dharmic . The Charvakas for example you know modern day periar day and what was he called maharishi Charvaka. Title maharishi is a very big title it was not given even to the Buddha, but Charvaka was given maharishi title. Charvaka followers of maharishi Charvaka complete pure beautiful atheism it is. The Ajivikas , atheist, no god at all, a contemporary of the Buddha and the Mahavira . there's no god there. The siddhas in fact the Ajivikas later on became siddhas they're also part of Sanathana dharma. They're also part of

Hindus. The Vedic religion is part of Sanatana Dharma . Like many other, it is not just only the Vedic religion, Vedic religion is one part or one aspect of Sanathana Dharma , so also the siddhas so also the Charvakas and Arya samaj or Brahma Samaj whether it's also Sanatana dharma. Buddhism is Sanatana dharma. And if you take Jainism also Sanathana dharma . And Mithraism ,was the faith of the Roman Empire. What did the Romans follow? They were following Mithraism and later on Christianity destroyed it. Mithraism is nothing but Sanatana dharma. Similarly, if you go to the ancient Greeks, Mithraism was prevalent in Rome in the Roman Empire. And we have Greek Greece whatever Greece is following was Sanatana dharma was later on destroyed by Christianity. Rome also Christianity came and destroyed it. Egypt nothing but Sanatana dharma but destroyed by Islam. So also Iraq that was also Sanatana dharma destroyed by Islam. Iran , pakka Sanatana dharma destroyed by Islam. Taoism China we deal with a lot of Taosim, nothing but Hinduism . Everywhere what is there is Sanathana dharma or Hinduism because an atheist also is a Sanatana dharma person whether you believe in anything or not it does not bother, it is due to the essence is freedom. There there's no freedom here the essence is freedom ,do whatever you want, believe whatever you want, perfect . You want to use sex as a route, go ahead. That also is permitted. Whatever you want. You want to fast, go ahead. You want to eat, go ahead. It's multiple things. You will find some tantric eating a lot of meat and fish and this that and drinking and dancing - Tantra. And they would also tell you we saw Shiva.

So that is the freedom here, because anything and everything will take you there. But one thing you must know is you do not all take everyone to the same thing but different different things. It does not matter about it. You go to Bombay, somebody go to Delhi , somebody goes to Kolkata. Sanathana Dharma is you go anywhere you like. But this particular path will take you only there. You follow that path, follow that path that will take you there. But leave the path and jump to something else and follow that. So this freedom is not there in these three faiths, this Abrahamic religions. So whatever is there is only Sanatana dharma. So tomorrow let us say all of the people here they

become atheist. No god everything is thrown out then that is Sanatana dharma. How can it ever die? How could it ever perish? It is imperishable. You see it does not take a stand. Its only stand is freedom. That's the only stand it takes. No other stand. People called me Bhagavan , no body gave this , people called me Bhagavan , it started , that is all . So you must understand , Hinduism or Sanathana dharma , Sanatana dharma is the actual name. Later on this Hinduism got added there. You may say it if you call it a religion there are several religions in that or several parts there and some have died also like Mithraism has died many things have died and some new things have come up so always some new things come up there some old things die but it continues to go on and on and on . So the question is what is Sanatana dharma , whether it will survive . Anything other than these three is Sanathana dharma. Will it survive? It has got to survive. There will never be a point of time when Judaism, Christianity and Islam will be the only one surviving there. Such a situation will never arise. So whatever is left over is Sanatana dharma and those left over is growing bigger and bigger by the day. More and more people are becoming atheist . Atheists are nothing but Sanathana dharma . You must go to the old text and see. It will happily survive. It'll all become atheist. It will happily survive. But these two in the meanwhile Christianity and Islam if nothing happens these two are enough to destroy humanity and the earth. They are fished off. These two are enough. Christianity and Islam are enough to destroy the world, to destroy the planet, destroy humanity. These two are enough. Therefore, there's no question of Sanatana dharma perishing. It can never ever perish. These two might go away because more and more they're becoming incompatible with science, incompatible with human values, incompatible with the idea of absolutely no freedom, incompatible with idea you have got to believe . That cannot survive or submit yourself that cannot survive. So they may go away unless they change they may go away and they are becoming more and more irrelevant. You must know that every day ,every day a church is being sold in the western world a church is being sold. You can buy a church if you want to fewer and fewer takers. It is happening in many other places also. If you want some thing is growing there , it is Sanathana Dharma growing there in America and Europe, many of western followers are Sanathinis.

Q4 | Dear Bhagwan do all paths lead to the same goal?

SRI BHAGAVAN

No. No. See, you must know the universe is so big and vast. The solar system, you know, it's quite big. It's nothing but the entire solar system, including the sun and the planet like a dust particle in the galaxy. So small it is. Galaxy so big. Billions of stars, much bigger than sun big, big planets are there. It is nothing at all. And that galaxy is one among billions of galaxies in the universe. And this is just one universe. There are billions of universes. You can imagine how tiny the earth itself is. How tiny you are. You're smaller than a bacteria when compared to the universe. So nature does not duplicate and it is a place of all possibilities. You can live any way you want and have any goal you want . Universe is not made like that . Therefore many many paths and you could follow any path which you choose and where you go depend on that path. You will find many wise people saying , all paths lead to the same goal. There's nothing like that , there supposed to be a great truth. But there's nothing farther than the truth than that. All paths do not lead to the same road, like how can all roads lead to the same city? Some roads will take you there. Some roads will take you somewhere else. But here every path is a road it'll take you somewhere. How many Lokhas are there? My god, so many Lokhas are there that you can land up in. There's no question of following different path and going to the same thing. Why should go to the same thing?

There are people who are actually we prefer to be in hell. There are people they say that's quite nice only to be roasted to be cut. What do you say? There are people like that. You may call them mad or crazy. So some may say no I want to be continuously drinking. There are Lokhas say you can be continuously drinking and enjoying. Yes, there are people who say we like to go to a world where you like to see people dancing away. Well, go there and see dancing. Go to the world of Indra, see all the beautiful people dancing there. If you want to do that, there's complete freedom for you. So don't be under the impression that whatever path you follow, go to the same place. No,

why should you go to the same place. So what if you go to hell? If you like being in hell and so many heavens are there, not one or two, so many varieties of heavens are there, you could go there. That is your choice. Similarly, when you die, a Christian goes to a Christian hell. A Muslim goes to an Islamic hell. A Buddhist goes to a Buddhist hell, a Hindu goes to a Hindu hell. But all hells are equally terrible. It's not that , it's an illusion only. But then depending on what you've been following, you'll go there only. Hindu, you'll go to a Hindu heaven, a Muslim, an Islamic heaven, it will differ. So don't think all go to the same place. No, your grandfather could have gone to some place, you go to some place.

Q5 | Dear Shree Bhagavan, what is the difference between Ekam and Kalki Dharma?

SRI BHAGAVAN

See Kalki Dharma essentially revolves around Paramjyothi Kalki also called Ammabhagavan . Ammabhagavan is the form in Bhulokha , Klaki Bhagavan , Kalki Bhagavathi revolves around them. Now you got to pray to Paramjyothi Kalki or Kalki and we will transfer that state to whomsoever you want to that the work we do and all the miracles that we do now but people all people may not like us. There are people who don't like us that is how the world is created all people are the same there are some people who don't like know what do we do with them they also we got to help they would say no who is he to give us Mukthi, who is he to give us Ananda ? I'll get there myself . So there are people like that so you must know there are people who don't like us who don't want to associate with us and who don't want to pray to us don't those who don't want to worship us there all kinds of people are there you just can't throw them out . They are made like that for so many reasons they made like that suppose you had a very bad relationship with his parents and then he may not like being there. So all kinds of people are there who just don't have belief who just don't have faith.

How do you help them? Ekam is there. Ekam does not revolve around Kalki cuz you need something else where you don't have to revolve around Kalki a lot of people would be left out any help for that. So for them also we'll be helping from behind. We'll be helping like for example now our devotees are throwing Ananda bombs at Christians, we help them and Muslims we help them. Our Muslim warriors are throwing the bombs at Muslims. We helping them get Ananda and get out of depression and other problems. So wherever you are whatever you are sometimes without your asking also we'll help from behind we'll help. Our function is only to help you. We don't mind who you are, what you are. We'll help you. But of course to our person it'll be more is more in tune with us. We could do more but others also we'll help. So Ekam is something where there's no Kalki. In Kalki dharma, Kalki is center, Paramjyothi Kalki means, Kalki Bhagavathi, Kalki Bhagvan means all those things.

Q6 | Sri Bhagavan how are miracles performed by gurus?

SRI BHAGAVAN

So if you take gods, there are a minimum of seven varieties of gods. I would go into it some other time because we running short of time. Similarly miracles are of various types. A commonest miracle that we witness is you go to a place worship a god or you attend a program the program also a miracle would happen to you. Now here you go to some temple or some place and worship or do something and a miracle happens. That place has nothing to do with the miracle that happened to you. merely visiting the place that atmosphere something happens to your mind which would then clear off some block, simple block and be causing a big problem for you. That block would go away because you went to that place you saw that building that structure and all but that god totally powerless and not all activated not involved but here something happened as you experienced all those things that block got cleared. Once the block has got cleared there, it's immediately conveyed to UI. It's controlling everything. Now that block has been cleared, it removed. You say the problem kind of with that block be removed and the

problem will go away. But I have had a severe backache. You go there and the block is removed inside you because of the whole atmosphere and then UI and your back would straighten up. A hunchback would can become straight. You would say it's a miracle. But no, God did it. It happened this way. UI was responsible of course.

Similarly but the guru point could be different. The same thing would apply to a guru also. But generally gurus if he's an avatar some gurus are avatars some are not. But these gurus are avatars. There are quite some number of them and they are different. They have a physical body here. They have another body in the other world. very similar to this body and whatever this guru wishes or blesses is communicated immediately to that being who himself only you must know once you become a space being you could be in many place at the same time like Ramalinga used to give public talks in five places and everywhere there were huge crowds and he used to be talking to a different places because he's a space being Ramalinga . Similarly the guru can be here and there also because he there you got a powerful hotline to UI. He can say clear of this person's problem and it it will be cleared that is a miracle of a higher order where that guru was able to bless you and your problem got solved because he's really in the other world and therefore it's much more powerful. So these gurus or this these people generally called Bhagavans also they have that like Shirdi Sai. So Bhagwan is he of course here and there also and therefore he thinks and he wants and the UI will immediately act there and the problem will get solved and even though the physical body is gone is still there the other world is still there all of them are still there in the other world that is another kind that is higher level miracle that is.

Q7 | Could faith alone produce miracles?

Yeah. Many people talk like this just like they take all path to the same thing goal. The faith by itself does not do cannot do a miracle. So now for example the sky is there. Suppose you are .I know a lot of people and who have been in trouble say oh god if you are there if you are there then please help me I want this they'll pray and it would get done and then he would say I pray to empty space and god answered. What he does not know is, we have a population here no outside the earth sphere or the earth realm the other realm there are many great beings. Some of them we worship in the temples. We call them angels. We call them saints. This that they're all there. Their only focus is to help people. So here is one man and remember they are space beings. They'll be everywhere at the same time. They find that he's praying. They do not want him to lose faith on God. They will interfere and they'll do the miracle there. So he thinks his faith did the miracle. His faith did not do anything. Seeing his condition, they were moved there. Similar suppose you are worshipping virgin Mary virgin Mary, I real examples then virgin Mary could be occupied so other things there also time constraints there might not be able to help you. And suppose there is another Hindu god passing that way , we are becoming aware that person would interfere and may even appear like Virgin Mary and solve the problem. So we will go into this in depth later on because now the process is to start and you're running short of time.

— CLOSING WORDS —

Sri Bhagavan's Closing Words

So we stop here. You have the process which is very important process. So all of you participate passionately and seriously in the process. And you would get the power now we'll be activating it. So once the process starts we'll be going to a deeper state and we'll be activating it and at the end of the process today itself you have to get ready and transfer Ananda to three people. Love you all so much. Love you.
